Take Some Time Out to Rest. Justin Schuelke Related Posts This Is What You Can Expect. See, for a long time I was pushing online repair manuals from Alldata and Mitchell1. I made some money, and in all fairness, they have a great product. The online manuals gave excellent repair information, had the exploded views and wiring diagrams that I needed to fix my car plus kept me up to date on recalls and TSB information. Alldata was bought by AutoZone and they made the decision to release most of their DIY Repair information to the public on their website AutoZone.com. The reality is that many car brands were pulling their repair information off of AutoZone and coverage was getting thin. I believe AutoZone made the decision that this was no longer helping bring in parts sales and removed the repair information from their website. You can still get their excellent repair information on Alldata or checkout Mitchell1 which I recommend highly as well. Please note, these other methods are illegal and not a recommended way to procure an auto repair manual.
