The people are illuminated with light from the flash while the backdrop is captured at a slow shutter speed so that both appear correctly exposed. The PhotoStitch program detects the overlapping portions of adjoining images and merges them. The exposure and white balance settings are set and o.c locked with the first image, Compose and shoot the second. Recording will automatically stop when the maximum is reached or when the CF cards runs out of free capacity. Filming may stop unexpectedly with certain types of CF card if it is a slowrecording card, if it has been formatted on a different camera or a computer, or if images have. Shooting with the viewfinder is possible, though, the parallax phenomenon may cause images composed with the optical viewfinder to be offcenter 33. Faster shutter speeds allow you to catch an instantaneous image of a moving subject while slower speeds create a flowing effect and allow you to shoot without a flash in dark areas. If the aperture value shows in red, the image is under exposed insufficient light or overexposed too much light. Adjust the shutter speed using the left and right buttons until the aperture value display turns to white. Selecting a lower aperture value opening the aperture allows you to fade the background. A higher aperture value closing it brings the entire range from foreground to background into focus. Turn the shooting mode dial to Av. Adjust the aperture value using the left and right buttons until the shutter speed display turns white. This is convenient for shooting fireworks and other images where it is difficult to set the correct exposure automatically. Turn the shooting mode dial to M. The shutter speed and aperture value appears on the LCD monitor if it is on. The AF frame will appear when the LCD monitor is turned on p. 40. The camera automatically selects between 5 AF frames to focus according to the shooting conditions. Appropriate for standard shooting conditions, including backlight scenes.

The camera evaluates Light Metering the complex lighting conditions, such as the position of the subject, the brightness, the background, the direct light, and the backlighting, and adjusts the settings to. Press the DISP. button to turn on the LCD monitor. This screen will appear again, once the image is shot. Set the white balance mode to a natural or artificial light setting according to the circumstances. Adjust the flash output using the left or right button. You can shoot the image right after selecting settings by pressing the shutter button. Focus Lock Method 2 Press the DISP.Press the shutter button halfway to lock the focus. Press the DISE button to turn on the LCD monitor. Use them as a shooting guideline only. The file numbers are reset to the start 1000001 each time a new CF card is inserted. New images recorded on CF cards with existing files are assigned the next

available number. The file number of the last image to be shot is memorized so that images recorded to a new CF card. About File and Folder Numbers Images are assigned file numbers from 0001 to 9900, and folders are assigned folder numbers from 100 to 998 Folder numbers cannot contain 99 in the last two digits. The last recorded image appears single image replay. Move between images using the left or right button. Use the left button to move to the previous image and the right button to move to the next. Change the image selection using the left, right, up or down button. Movies cannot be viewed in index replay.Press it again to resume. Return to Single Image View First Frame Previous Frame Rewinds if the SET button is held. Select the movie you wish to edit and press button. See Viewing Movies p. 122. Select Edit usingthe left or right button and press button. The movie editing panel and the movie editing bar appear. See Selecting Menus and Settings p. 43. Select an image you want to rotate using the left or right button and press the SET button. The sound data is saved in WAVE format.

SCHEMATIC DIAGRAM CAMERA-MAIN C.B.A.

The LCD monitor displays each image for approximately 3 seconds.See Selecting Menus and Settings p. 43. Select an image you want to protect using the left or right button and press the button.Exercise caution before erasing a file. A confirmation screen appears.A confirmation screen appears.Please note that formatting initializing a CF card erases all data, including protected images and other file types.It can also be used with DPOF print settings. Connect the camera and printer using the cable.Options for the Style category will differ slightly for BJ printers. An image can be printed when displayed in single replay or selected in index replay. Choose an image using the left or right button and press the button. A confirmation dialog appears.Specify the desired number of copies using the left or right button. You can specify from 1 to 99 prints. You can select from among the following print styles. Direct Print Function Compatible Printer. As a result, the images top, bottom and sides may be cropped slightly. The trimming frame will appear at the center of the image. If a trimming setting has already been selected for the image, the frame will appear around

the previously selected portion. Prints the top area of an image. Middle Prints the middle area of an image.This is extremely convenient for sending images to a photo developing service or for printing on a direct print function compatible printer CP Series You can set the number of copies up to 99 to be printed using the up or down button. See Selecting Menus and Settings p. Turn off the camera p. 30. Attach the AV Cable to the terminal on the camera. NTSC Japan, U.S.A., Canada, Taiwan, etc. Please see the Software Starter Guide for information system requirements and installation instructions. Connect the supplied USB interface cable to the computers USB port and the cameras DiGiTAL terminal. The LCD monitor displays in replay mode.

http://www.erejuvenation.co.uk/images/brother-hl-2060-manual.pdf

When the connection to the computer is complete, the LCD monitor turns off and the green indicator lights steady. This is useful for downloading images to a computer in which the software is not installed. These are called My Camera settings.Turn on the camera. The mode dial can be turned to any setting. MENU Press the button for longer than 5 seconds. Resetting settings to default. No Memory card You attempted to shoot or replay images without a CF card installed. Cannot record!Yeu attempted to shoot an image without a CF card installed. Note the number and contact our Canon Customer Support Help Desk. If an error code displays directly after taking a picture, the shot may not have been recorded. Depending on the printer model, some messages may not display. No Paper Paper cassette is incorrectly inserted or out of paper. Or the paper feed isnt operating correctly. The following messages may appear when the camera is connected to the direct print compatible. Please request replacement of the waste tank at your nearest Canon customer support center listed in the Bubble Jet Quick Start Guide. Printer error Turn off the printer, then turn it on again. If. Replace the date battery holder back into its original position, and close the DiGiTAL terminal cover. Please do not attempt to charge any other type of batteries with this charger. Please unplug the adapter from the power outlet when you have finished using the camera. Please do not attempt to use any AC adapter other than AC Adapter Kit ACK600 with your camera. In order to attach any of these lenses, you also need to use the optional Conversion Lens Adapter LADC52C. Use this converter for taking wideangle shots. The wide converter changes the focal length of the camera bodys lens by a factor of 0.7 The thread diameter is 52 ram.. The lens changes the focal length of the camera bodys lens by a factor of 2.4x. This lens makes it easy to take macro shots.

Contents show 1 An Introduction to Canon PowerShot A60 Manual 1.1 The Overall Look of Canon PowerShot A60 1.2 The Specification of Canon PowerShot A60 1.2.1 Quick Specification of Canon PowerShot A60 1.3 The Price and Impression of Canon PowerShot A60 2 Canon PowerShot A60 Manual User Guide An Introduction to Canon PowerShot A60 Manual It is such a perpetuation that a product, especially for the digital camera product, can't be separated from its manual. By using this manual, user will be able to understand about their product deeper. Therefore, operating and treating the camera better will be something possible. This is exactly why we provide the Canon PowerShot A60 Manual. The only aim is to educate the users of this camera to use this product better so that they can result a good photographical image. The Overall Look of Canon PowerShot A60 It is generally known that look is something important that becomes a consideration for people in buying digital camera product. With the look, People can instantly attracted to a certain digital camera product. More than that, sometimes the choice of camera look is also reflecting the personality of owner as well as the classiness of the camera itself. So, before we hit the Canon PowerShot A60 Manual User Guide directly, now we are going to talk about the look of this camera first. At glance, the battery tube seems quite big, but it will be a best place to handle this camera.

The body keeps using plastic for its durability in lightweight. But, it has solid and professional look by having aluminum brushing over the body. Based on the Canon PowerShot A60 manual, it has 101 x 64 x 32 mm body dimension, Canon PowerShot A60 is easy to pack even in small pouch. This size is also purposed to make it fits in most hand. Better still, the overall weight is approximately 215 gram including card and battery. The buttons are specially designed in precise size to bring easier operation. The Specification of Canon PowerShot A60 The Canon U.S.A has been recognized as a strong contender in photography and filming industry Canon Aseries is back with the brand new Canon PowerShot A60. Belonging to Aseries, this camera indeed is bringing compact body with high practicability in use. This product is introduced officially on August 2003 to the global market. The A60 replaced the popular Canon PowerShot A40 which is topped the chart in several photography websites. Let's see why this camera should be watched through the explanation below. The users are able to get the most outstanding image quality at 1600 x 1200 and 240p AVI video. It is easy to get perfect image since the ISO setting, white balance preset, and JPEG quality level are adjustable. On the optic and focus sectors, this camera featured builtin lens that offers 3x optical zoom. Having 35105 mm focal length and f2.84.8 aperture, this is the lens you are looking for. The good news is that you have the opportunity of using manual and autofocus mode based on your desire. Builtin flash is added to accompany your shot in low light area. This flash supports manual, off, on, and auto

mode and reach up to 2.50 meter. In a further explanation, Canon PowerShot A60 manual tells that the LCD Screen is quite big. It has 1.5 inches and supporting Live View feature. For connectivity, the USB 1.0 is ready to make a realtime data transfer.

Last but not least, 4 x AA batteries are required to supply the power for this camera. There are also several creative shooting modes and photo effects waiting to try. Aside from that, the A60 brings real compact body that is aimed at light travel usage. As off 2003, this camera is priced at 349 USD. Read another review about this camera in this page. Canon PowerShot A60 Manual User Guide As we stated at the beginning of this article, the aim of providing this writing is to bring the Canon PowerShot A60 Manual. This is the manual that will give you the information related to the specification, features, operation, instruction, camera manual, and others. So, for you who want to look for information regarding to this Canon camera product, referencing to the manual below will be the best thing to do.
